

### **Making a fan with the download on the next page.**

1. Print in color on A4.
2. Cut out the rectangle all around.
3. Fold the lines into a harmonica.
4. Cut in half on the center line from A-B to the last green block. You leave these attached.
5. Stick C on C.
6. Take a card, draw a line across the center line of the card. Do this at the top or bottom, about 2 cm. from the edge\*. Use extra glue on the center fold of the card.
7. Stick strip B (the blue part) on the card on the left side
8. Stick strip A (the red part) on the card on the right side.
9. Push the fan firmly in the middle, onto the extra glue applied on the fold line of the card. Fold the card and let it dry until the fan is well secured in the middle.

\*Choose the bottom or top. With both options you have room to write, for example your own words for underresponsive reactions or overresponsive reactions.

When choosing the bottom, the fan remains in the card when folded (easy storage). When choosing the top, writing is easier and the fan does not get in the way.

A	B
C	C
